DETAILED ACTION

Response to After Final Amendment

1. For the record, the after final amendment received February 17, 2004 and the request for reconsideration received April 16, 2004 have been entered. Further consideration has been given to the arguments therein.

Drawings

2. The drawing received September 4, 2003 is acceptable for examination purposes.

Allowable Subject Matter

3. Claims 1-4, 6-9 and 11-17 are allowed.

4. The following is an examiner's statement of reasons for allowance: none of the prior art of record appears to teach, suggest or render obvious the invention of claim 1. The difference between the instant claims and prior art of WO 97/23007 is that WO '007 does not teach or suggest a planar support in form of a porous metal and/or metal alloy place structure made from ferritic stainless steel, nickel-based alloys, and/or high chromium alloys," as recited in independent claim 1. The prior art of WO '007 employs a cermet having metal additives therein. Upon further consideration it is agreed that the instantly claimed planar support material does not include the cermet mixture of WO '007.

Based on such metallic materials, the porous support obtains substantially improved mechanical properties and high thermal conductivity ensuring high performance of the fuel cell system (instant specification, paragraph bridging pages 4 and 5).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
